## PROJECTS

---

### Project: Rest API

**Language:** Java

#### Details:

I have tried to develop **Rest API** in which I have performed some basic **CRUD** operations, like reading data, writing data, updating data, And deleting data. Rest API testing is performed by using **Postman**. **Postman** is an API platform for building and using APIs. API is created by using **Spring Boot** and the **JPA** concept. **MySQL** is used for database connection.

### Project: Blood Donation System

**Language:** HTML5, CSS3, Node JS, MongoDB

**Domain:** Web Development

#### Details:

Created an interactive Blood Donation website serving as an interface to store and retrieve user details. Update and a delete option for users to delete personal details. This platform is built using **HTML5**, **CSS3**, and **Node JS**. On the backend, a **MongoDB** database is used to store the contact details.

### Project: Pune Covid Care

**Language:** HTML5, CSS3, Bootstrap, JavaScript, Python, Firebase

**Domain:** Web Development

#### Details:

This website emphasizes real-time data. This system is a dynamic website where citizens can get real-time information about available resources in Pune city. Also fetches the API of COVID-19 India to show patient information on a website. One chatbot module is created for the users to solve their queries regarding the COVID-19 virus by using Python.

## ACHIEVEMENTS

---

- **5 Stars** for **C++**, **Java** and **SQL** on **Hackerrank**.
- **Solved** more than **100 DSA Questions** on **LeetCode**.

## SKILLS AND HOBBIES

---

**Skills:** Communication, Problem-Solving, Creativity

**Hobbies:** Web Designing, Craft

I hereby acknowledge that the information furnished above is correct to the best of my knowledge.
